INSTALLATION – IMPORTANT GUIDANCE

Installation of your V4 floor is considered acceptance of goods.

All V4 floors must be installed by an experienced and fully competent flooring installer who has the necessary skills to complete each installation in line with the BS8201:2011 standard. The responsibility for inspection of goods lies with the installer, and it is their duty to notify V4 of any potential concerns prior to installation.

DO NOT COVER AN INSTALLED FLOOR WITH A NON-BREATHABLE COVERING FOR LONGER THAN 1 WEEK.

Prolonged covering may create a microclimate which can damage the protective top layer. Underfloor heating will greatly magnify the effect. For full guides visit v4.co.uk/support or scan the Product QR code.
